Objective

Aspiring AI Engineer with strong foundations in Computer Vision, Deep Learning, and Data Science. Skilled in building and deploying machine learning models, with hands-on project experience in medical imaging and object detection. Seeking opportunities to apply technical expertise and contribute to innovative AI-driven solutions.

Education

Bachelor of Computer Science (Expected 2026)

Misr Higher Institute for Commerce & Computers

Fourth-year student

Professional Experience & Training

AI Internship – National Telecommunication Institute (NTI) | Remote

- Practical training in Deep Learning & Computer Vision.
- Projects: Chest X-ray classification, Mask detection system.
- Applied data preprocessing, transfer learning, and model deployment techniques.

Training Course – Data Analytics & Data Visualization (Sprints) | Apr 2025

Projects

Chest X-ray Classification (COVID-19, Pneumonia, Normal) – Built a CNN-based model for medical image classification.

Face Mask Detection System – Developed a real-time mask detection application using CNN.

Object Detection using YOLOv8 – Applied advanced detection models for real-world object recognition.

Certifications

- Generative AI Certificate (GAIC) – IOM, Sprints
- Python Programming – Sprints
- SQL for Data Science Interviews – 365 Data Science
- Python Programmer Bootcamp – 365 Data Science
- Power BI – 365 Data Science
- Tableau – 365 Data Science
- Introduction to Data & Data Science – 365 Data Science
- Intro to AI – 365 Data Science
- Dates and Times in Python – 365 Data Science
- The Machine Learning Process A-Z – 365 Data Science

Skills

Technical: Python, TensorFlow, Keras, SQL, Power BI, Tableau, YOLOv8

Languages: Arabic (Fluent), English (Good)

Soft Skills: Critical Thinking, Problem Solving, Teamwork, Communication
